

WE ARE HIRING!

CHIEF ENGINEER

Lead and oversee the effective delivery of all maintenance and engineering services across the Resort to ensure guest satisfaction, asset protection, safety compliance, and uninterrupted operations. The role is responsible for both reactive and preventive maintenance, technical troubleshooting, and the long-term reliability of all plant, equipment, and facilities.

Qualifications:

- Degree or equivalent qualification in Engineering (Mechanical, Electrical, or Civil)
- Previous senior engineering or facilities leadership experience
- Strong knowledge of health, safety, and regulatory compliance
- Willingness and ability to work shifts, including late nights, weekends, and public holidays

Kindly send your resume to
